

WIŚNIOWSKI

External doors

CREO | DECO | NOVA

For the last three decades, we have been following the idea of the founder of the WIŚNIEWSKI brand, Andrzej Wiśniowski, who made it his goal to create innovative products addressing all of our customers' needs.

We want your home to be safe, secure, and comfortable. Taking advantage of our over 30 years of experience in the production of garage doors, gates, windows, doors, and fences, we offer our customers top quality products. We know what a modern home needs and what challenges the household may face.

Currently, our production hall spanning 270,000 square metres manufactures thousands of garage doors, gates, windows, doors, and fences every day. At the same time, we are also able to customize the products to meet our customers' requirements.

Everyone has different needs and expectations, which is why when manufacturing our products, we focus on listening to what you have to say.

Meet the WIŚNIEWSKI brand – enter the world of comfort, safety, and security.

Choose a door for you

The element of your home you interact with most often is the door. All the guests see it, too. The fence and the façade give the first impression from the outside, whereas the door is a part of two realms – the outside and inside of your home. This is what makes the choice especially important, as the door has to visually connect the interior with the building façade and its surroundings. Each building is different, so we made it possible to fully customize your WIŚNIEWSKI door. This way, you not only take care of the comfort and safety of your family, but you highlight the uniqueness of your home.

Aluminium **CREO** door with a double-sided flush panel

The whole face of the door leaf (inside and outside) is covered with top-quality aluminium sheets. The surface of the leaf is aligned with the surface of the frame, creating a flush, consistent, and elegant surface on both sides. Thanks to a special leaf infill and high-quality aluminium profiles, the U_d thermal transmittance factor of the CREO door is as low as 0.8 W/m^2 (for the door size of $1,400 \times 2,500 \text{ mm}$ with a solid panel).

Aluminium **DECO** door with
an insert panel

The door is available in three versions:

- DECO PLUS,
- DECO BASIC,
- DECO LIGHT.

The door leaf is based on aluminium profiles of different thickness, which lets you choose a solution best suited to the specific requirements of a residential building.

NOVA external door with a steel leaf and
an aluminium frame

The NOVA door structure is formed by an aluminium opening frame with a thermal break 77 mm thick. The leaf is made of steel sheet and infilled with an extruded PU foam board with a double chamber glass unit.

Technology is the foundation of beauty

When creating our doors, we think about the design, modern trends, and appealing styling. But we put just as much effort into what cannot be seen at first glance. This approach guarantees that your door will not only look perfect, but will also provide security, safety, warmth, and peace and quiet for many years to come. Our investments into technologies of the Fourth Industrial Revolution make both our products and your life better and more beautiful.

Your custom **CRE(O)**ated door

The design of the CREO door stands out thanks to its simplicity and elegance. It reflects the passion for modern trends in architecture and at the same time easily fits in with various approaches to decoration. What inspired the concept of the **CREO 300** was the observation of our customers' tastes. It is a design tailored to each user's individual vision. This unconventional approach to design allows you to become the creator of your own surroundings.

LUXURY CLASS

WARRANTY

WIŚNIEWSKI provides a 5 year warranty for the CREO doors.

Welcome to the world of **CREO doors**

External aluminium doors by WIŚNIEWSKI are a perfect solution for customers who value originality and unlimited possibilities of choice adapted to their own vision of their home. WIŚNIEWSKI doors provide freedom to create an individual and unique model. This is our creative approach to the individual needs of our customers.

WIŚNIEWSKI doors are an optimal solution that combines excellent thermal parameters, as well as noise and burglary protection with functionality and beautiful design.

SAFETY

The RC2 and RC3 anti-burglary classification of the CREO doors certified by IFT Rosenheim Institute.

BURGLARY PROTECTION

THERMAL INSULATION

The thermal transmittance factor U_d is 0.8 W/m^2 for the CREO door with reference dimensions of $1,400 \times 2,500 \text{ mm}$ with a solid panel.

THERMAL INSULATION

SOUND INSULATION

The CREO doors reduce noise from the outside to provide acoustic comfort.

SOUND ABSORPTION

RIGIDITY

CREO doors are certified for the 3rd climatic class according to PN-EN 12219:2001. Tested for E and D climates.

RIGIDITY

DESIGN

CREO doors are about universal design and the capability to create an individual product based on the 300 door.

DESIGN

LUXURY CLASS

Standard CREO aluminium doors include high-quality materials as standard, which guarantees safety, security, and durability and places them among products of the highest class in this segment.

LUXURY CLASS

WARRANTY

The warranty for the CREO doors is 5 years. Door hardware and accessories are covered by a 24-month warranty.

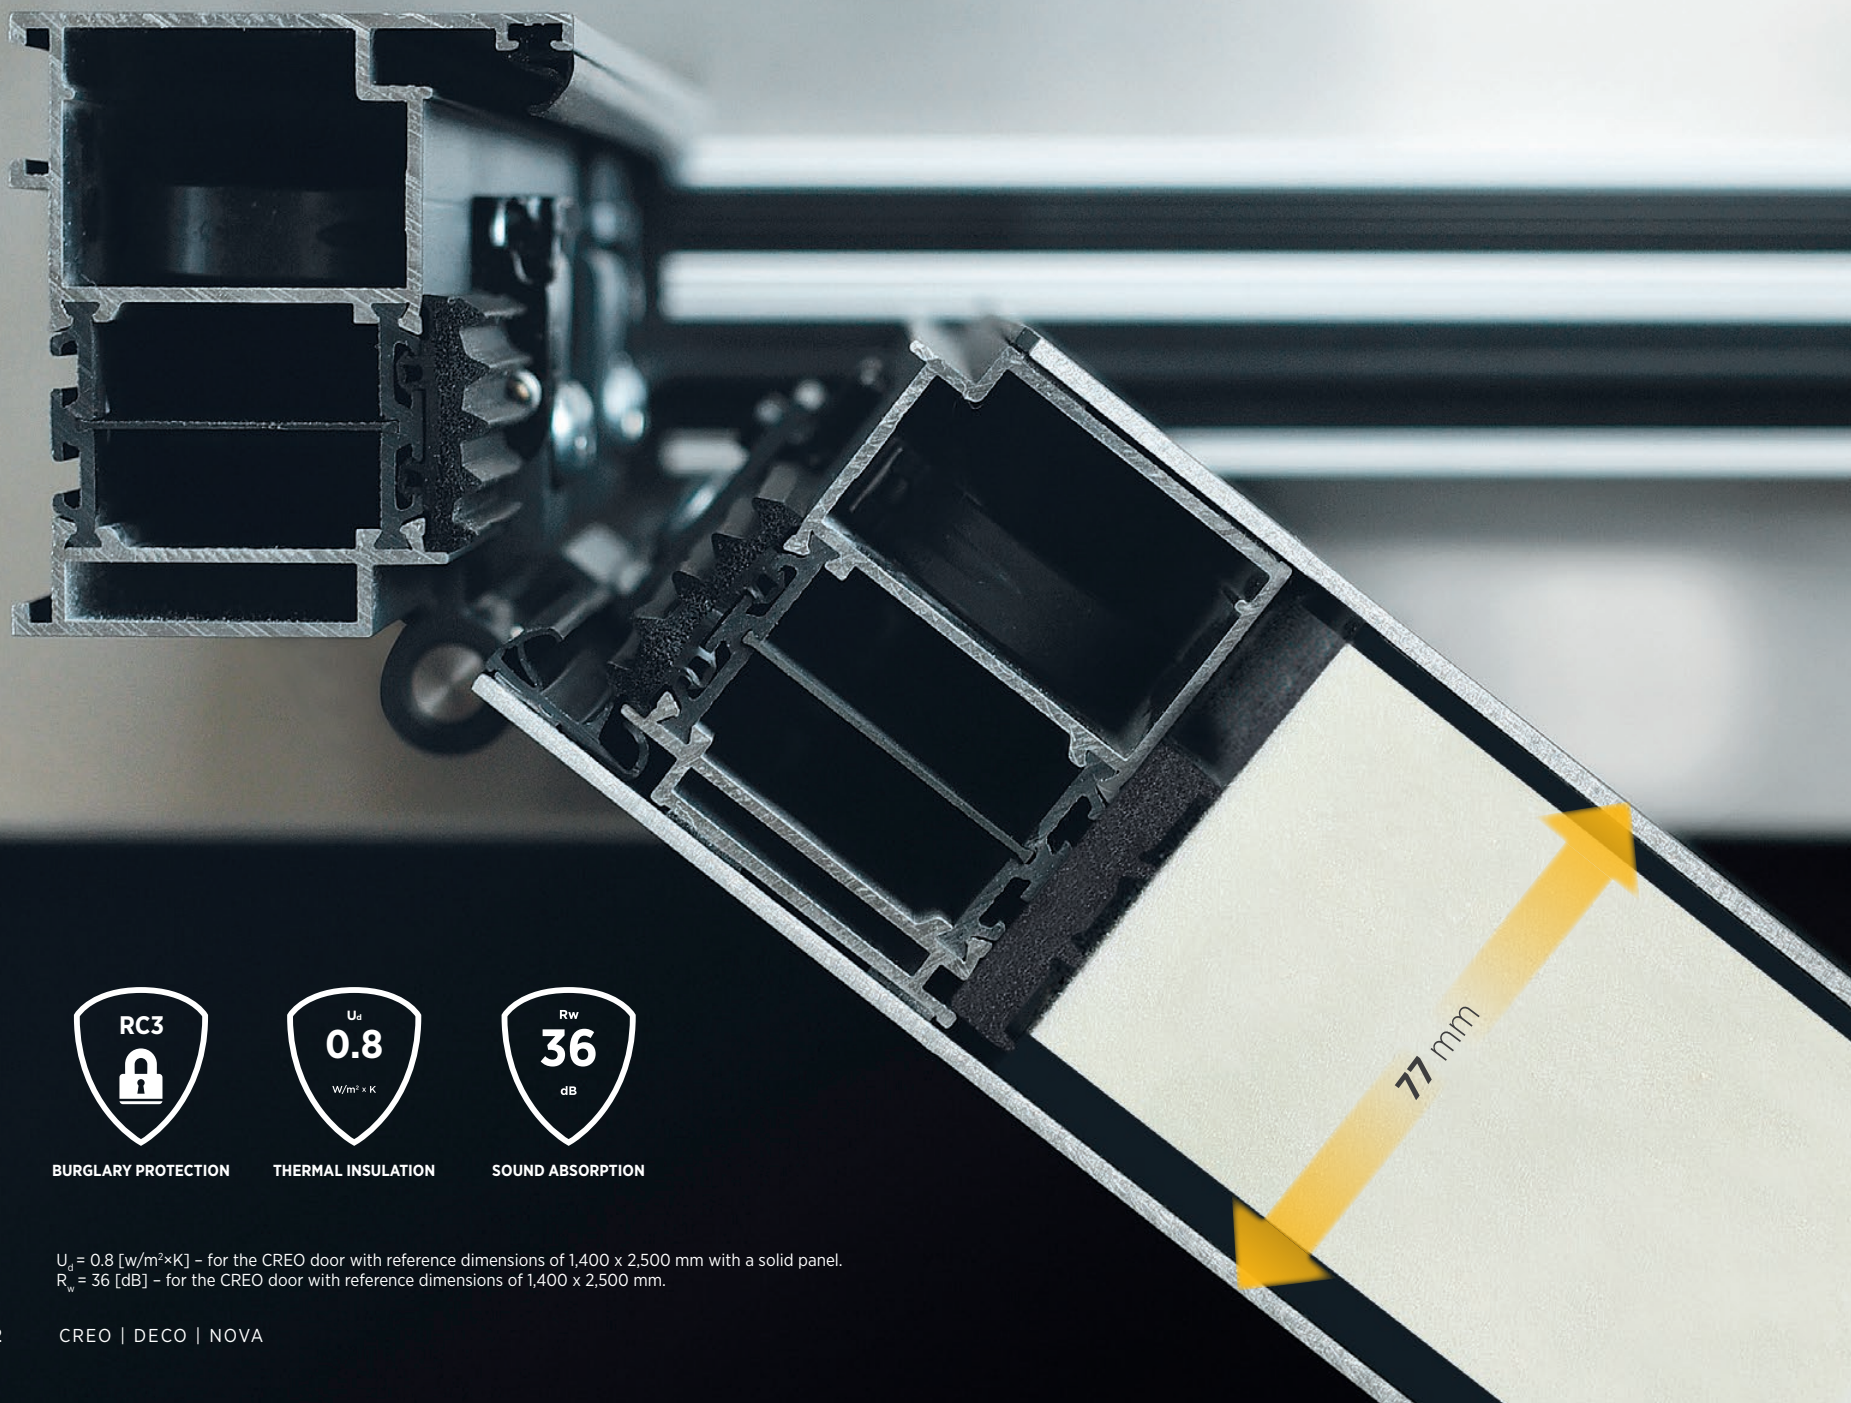

WARRANTY

ACCESS CONTROL

WIŚNIOWSKI entrance doors may be fitted with a wide range of solutions providing full control over home access.

ACCESS CONTROL

BURGLARY PROTECTION

THERMAL INSULATION

SOUND ABSORPTION

$U_d = 0.8 [W/m^2 \times K]$ – for the CREO door with reference dimensions of 1,400 x 2,500 mm with a solid panel.
 $R_w = 36 [dB]$ – for the CREO door with reference dimensions of 1,400 x 2,500 mm.

CREO doors

- 1 Aluminium door leaf** 77 mm thick with a double-sided flush panel
- 2 The leaf frame and the opening frame** are made of four-chamber aluminium sections with a thermal break
- 3 Liverpool I handle** as standard, ten other types of handles in several colours are available as an option
- 4 DuoSecure automatic three-point lock** without the day latch function as standard, electric locks available as an option
- 5 Day latch function button** (inside – activates the function, and outside – unlocks the lock). The external button can be installed in the lining or in the pull
- 6 Stainless steel decorative motifs** as standard, optionally in mat structure and DECOR colours, film coated or black anodized

⁽¹⁾ - Glass only available in sidelights and toplights. ⁽²⁾ - Safety glass, sanded on both sides, with viewing strips.

Discover NOVA

NOVA doors are aluminium and steel external doors which combine excellent technical parameters with vast decorative options. The collection includes 39 predefined models available with an extensive range of RAL mat structure colours, Decor colours, and wood effect film coatings. The standard accessories include an automatic three-point lock which – thanks to three points of action – ensures that the door resists water and wind. A high parameter of watertightness makes it possible to install the NOVA door even in areas without roofing, without any concern for its strength and durability.

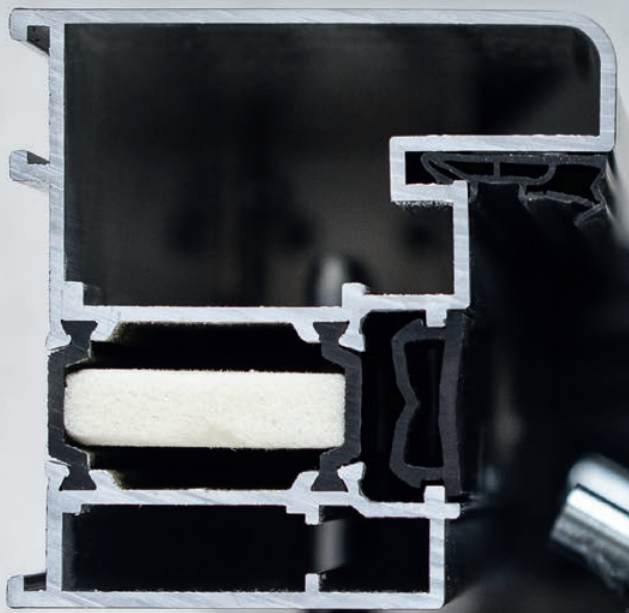

FUNCTIONALITY

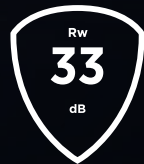

18

THERMAL INSULATION

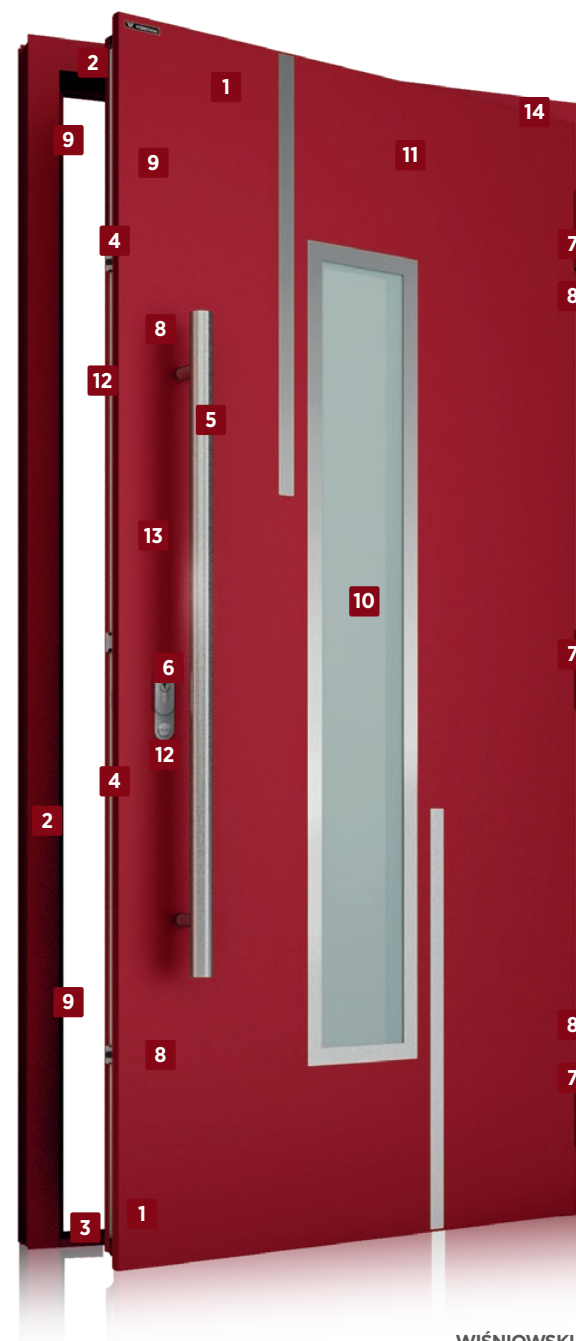

SOUND ABSORPTION

U_d from 0.87 [W/m²·K] – thermal insulation for solid door with plastic threshold 1,180 × 2,350 mm.
 R_w = 33 [dB] – sound insulation according to PN-EN ISO 717-1:2013 for glazed doors.

NOVA door

- 1 Door leaf 78 mm thick** – steel, with a thick rebate, infilled with a PU board and a laminated wood rail and stile
- 2 Aluminium opening frame** made of three-chamber sections with a thermal break 77 mm deep
- 3 Plastic threshold** in black colour as standard, an aluminium threshold with a thermal break is available as an optional accessory
- 4 Automatic three-point lock without the day latch function** with 3 strike plates enabling simple adjustment; optionally a lock with the Autotronic electric motor
- 5 A broad range of handles and pulls** made of stainless steel or in black colour
- 6 Standard lock cylinder with 3 keys** in stainless steel colour, optionally in black colour
- 7 3 hinges** adjusted in 3 planes
- 8 Anti-burglary bolts** – 6 pieces as standard
- 9 Gasket in the leaf** around the circumference and an additional one in the opening frame
- 10 In the leaf – double-chamber safety glass with black warm edges** recessed in the leaf lining, in sidelights – double-chamber safety glass with a black warm edge
- 11 Colours** – leaf made of galvanized and powder coated sheet in dedicated RAL colours (mat structure), also available in HI 2.0 and Decor colours, as well as with wood effect film coatings
- 12 Day latch function buttons** (optional accessories)
- 13 Access control systems** (optional accessories)
- 14 Door closer concealed in the door leaf** (optional accessory)

A feast of colours

Colour is the first feature our senses react to. We made every effort to ensure that the colour palette of WISNIEWSKI external doors should cater to even the most sophisticated tastes.

Different finishing technologies provide a unique look to the CREO, DECO, and NOVA doors. Mat structure colours from the RAL and DECOR palettes provide exceptional visual effects, while film coating makes it possible to obtain a wood-effect structure.

Create your individual colour composition to match both your interior and façade design. Open up to new possibilities. Embrace the colours.

BICOLOUR

Thanks to the bicolour mat structure painting option for the door, the colour of the CREO door can be different inside and outside.

Mat structure colours, DECOR and film coatings.

Standard colours

I am smartCONNECTED

The functionality behind the smartCONNECTED name is an investment that benefits your entire family, because to enter your home, you no longer need to lug around a weighty bunch of keys. Parents can let their children inside without leaving the office. You can also check whether the gate is closed by using your smartphone. What is more, thanks to the use of algorithms, your smart home can memorize the lifestyle of its inhabitants and perform basic actions, such as opening and closing the roller shutters for them. And with the global positioning function, it can also open the gate just before you arrive home.

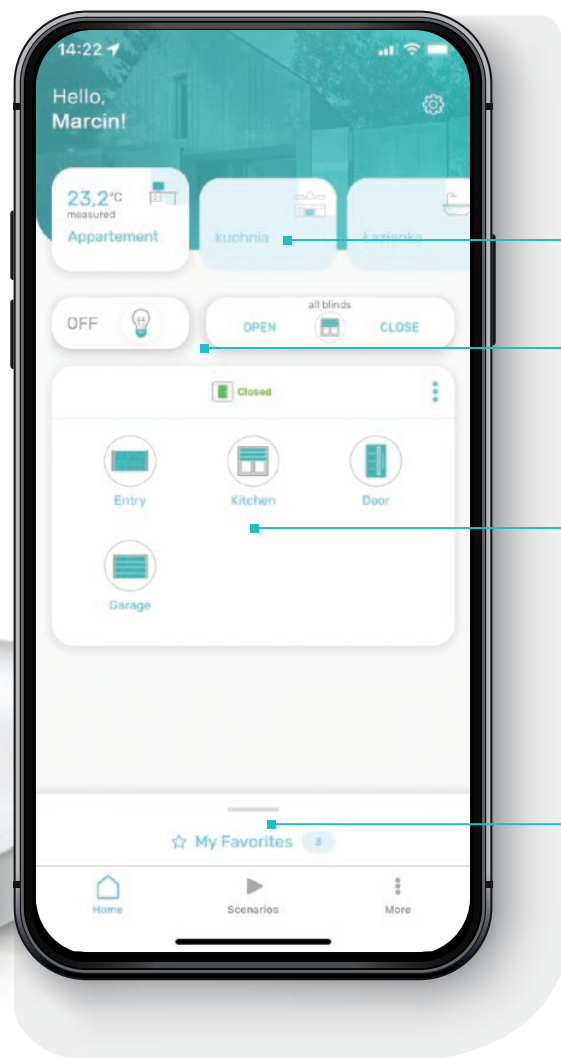

TREAT YOURSELF TO COMFORT AND SAFETY

- Control your garage doors, gates, windows, doors, and roller shutters remotely.
- Open garage doors and gates without touching your remote.
- Manage your home via a voice assistant.

WIŚNIOWSKI POWERED BY somfy.

CREATE A ROOM in your home.

CONTROL GROUPS OF lights and roller shutters.

CONTROL INDIVIDUAL devices.

Create YOUR OWN OPERATION SCENARIOS.

SmartCONNECTED brings the CREO and DECO doors with an electric lock to the next stage of product development and makes it possible to tailor them to the requirements of increasingly demanding customers. On the one hand, it makes it possible to control the devices with a smartphone, and on the other, it gives the users full control and lets them stay in touch with their home from any place in the world. io-homecontrol® makes it possible to wirelessly connect the Lock Controller io to the smart home system controlled by the WIŚNIOWSKI smartCONNECTED Box and Somfy TaHoma Switch central control units. Building a comprehensive smart home provides a number of benefits and additional features that enhance your comfort every single day.

Let us inspire you in your search for new solutions!

WIŚNIEWSKI doors protect access to your home and improve its appeal not only from the front. To ensure comprehensive safety and create a visually cohesive effect, we prepared a range of technical doors, side doors matching the garage door, and patio doors. Discover how much we can offer you.

WIŚNIEWSKI. Garage doors, windows, doors, gates, fences.

It's great when everything goes together perfectly...

because harmony is the highest form of beauty. Choose your **garage door, windows,** and **shutters,** as well as **doors** and **fence** in the Home Inclusive™ system, which will create a matching set in terms of design and colour. Highlight this harmony with the smartCONNECTED smart control function and meet perfection that will never go out of fashion. A matching set of joinery and fence? From a single manufacturer in uniform design – because it is great when all the elements harmonize with your dreams, your home, and one another.
